

es.ull.esit.app.evolutionary
_algorithms.complement.Crossover

```
graph LR; A[es.ull.esit.app.evolutionary_algorithms.complement.Crossover] <-- B[es.ull.esit.app.evolutionary_algorithms.complement.OnePointCrossover]; A <-- C[es.ull.esit.app.evolutionary_algorithms.complement.UniformCrossover];
```

The diagram illustrates a class hierarchy or inheritance structure. On the left, a gray-shaded box represents the base class: `es.ull.esit.app.evolutionary_algorithms.complement.Crossover`. To its right, two white boxes represent subclasses: `es.ull.esit.app.evolutionary_algorithms.complement.OnePointCrossover` (top) and `es.ull.esit.app.evolutionary_algorithms.complement.UniformCrossover` (bottom). Blue arrows point from each of these two subclass boxes to the base class box, indicating that both subclasses inherit from the base class.
